

APTECH AT NUB — EMPOWERING STUDENTS WITH ESSENTIAL EMPLOYABILITY SKILLS

NUB is committed to secure its student's future by empowering them with the necessary knowledge and employability skills needed to introduce a generation of leaders ready for employment immediately upon graduation. Consequently, in 2017-2018, **NUB** collaborated with Aptech Academy of Learning and Training Ltd. in India, offering internationally accredited English and IT courses as university requirements at all faculties. Courses are compulsory for students who start their first academic year at **NUB** and are taught over three years of study, within three academic years, across six academic semesters.

ELECTRONIC LEARNING SUPPORT (ELS):

NUB designed its very own online learning system named the Electronic Learning Support (ELS); an application for online teaching, learning, community building, and knowledge sharing. Our ELS system is one of **NUB's** vital educational pillars which not only sets it at the forefront of Egyptian universities, but also provides easy access for students through **NUB's** website and is designed to:

- Facilitates learning
- Enables students to interact with their tutors and peers on a daily basis
- Increases productivity and efficiency of educational learning
- Helps students in solving the most critical challenges in today's ever- changing environment while increasing their chances to succeed.

- The Faculty is staffed by a distinguished and selected group of faculty members with a high H index
- The Faculty has centralized research laboratories and an animal and pharmaceutical design laboratory equipped with state-of-the-art equipment, leading to the publication of prominent international publications and patents
- The Faculty offers training programs aimed at raising the level of scientific and practical skills of students
- Successful faculty graduates can be found all over the country, working efficiently and professionally to serve the community

NAHDA UNIVERSITY ANIMAL HOUSE

The Animal House is a special unit of **NUB** and supervised by the Faculty of Pharmacy, which provides various research services to students and researchers from NUB and other universities by:

- Providing experimental animals for scientific research free of charge
- Breeding experimental animals such as rats and mice
- Providing a suitable laboratory space for researchers from various Egyptian universities to carry out their scientific research
- Providing appropriate laboratory spaces equipped with advanced tools and equipment in order to create an ideal research environment aimed at conducting scientific research efficiently and conveniently
- Providing treatment and surgery laboratories to collect samples after trials
- Introducing new scientific techniques that are always updated to ensure a competitive advantage.

STUDENT SUMMER TRAINING

Students are granted direct access to training opportunities during mid-year and summer vacations at top-class workplaces relevant to their specialties. Accordingly, they are well prepared to work in distinguished and prestigious workplaces after graduation.

NAHDA CONTINUOUS EDUCATION CENTER (NCEC)

NUB Continuous Education Center (**NCEC**) is a chain that connects the university with society. The center allows the largest possible number of community members to benefit from the expertise, experiences and resources available in **NUB** by offering programs that develop the required skills and expertise while providing a supportive and encouraging environment, in theory and in practice.

In addition, the center is tasked with improving teaching, learning and training methods to develop the capabilities of all parties involved in the educational process, leveraging academic expertise by offering advanced programs that develop the abilities and skills of **NUB** faculty and staff. The Center also offers advanced training programs for academic and administrative leaders to improve their leadership performance and decision-making abilities, as well as their intellectual and research skills.

NCEC offers a wide range of training programs and integrates with courses offered by Aptech, Huawei, Cisco and Oracle academies.
